[Thinking Through Loneliness](#) Diane Enns 2022-04-21 "This is the peculiar paradox of loneliness: I am unseen yet I feel exposed, as though my most internal suffering were on public display, as though I am disclosing to the world the vulnerability it does not want to see." By reflecting on the experience of loneliness through the author's own life, the narratives of others and analyses from Arendt to Berardi, *Thinking Through Loneliness* explores the ambiguities of being alone. It seeks to defy the reductionist tendencies of the current loneliness experts, looking beyond loneliness as a collective health crisis to consider what it tells us about our great need for one another and what happens when we fail to meet this need. Our social needs vary, however; to investigate loneliness is to inquire into the contradictions of the human condition—we are alone and together, separate and attached—which gives rise to the need for individuality on the one hand, and for intimacy on the other. To be lonely is to suffer from an unfulfilled desire to be close to others. But we can also suffer from an unfulfilled desire to be separate from others. Diane Enns explores how loneliness might be an inescapable dimension of human existence, but also the collective symptom of social failure. The lonely are not to blame for their distress; they are witnesses to the failure of our contemporary social world, dramatically transformed in recent decades by digital technology, and changes in how we work, love, socialize, and live together in households, neighbourhoods and cities. Enns argues it is crucial to recognise the structural conditions—economic, political, institutional, technological—that give rise to the isolation that produces loneliness. Only then can we work to undermine these conditions, preserving all that is best about human social life.

Foodscapes, Foodfields, and Identities in the Yucatán Steffan Igor Ayora-Diaz 2012-01-30

The state of Yucatán has its own distinct culinary tradition, and local people are constantly thinking and talking about food. They use it as a vehicle for social relations but also to distinguish themselves from "Mexicans." This book examines the politics surrounding regional cuisine, as the author argues that Yucatecan gastronomy has been created and promoted in an effort to affirm the identity of a regional people and to oppose the hegemonic force of central Mexican cultural icons and forms. In particular, Yucatecan gastronomy counters the homogenizing drive of a national cuisine based on dominant central Mexican appetencies and defies the image of Mexican national cuisine as rooted in indigenous traditions. Drawing on post-structural and postcolonial theory, the author proposes that Yucatecan gastronomy - having successfully gained a reputation as distinct and distant from 'Mexican' cuisine - is a bifurcation from regional culinary practices. However, the author warns, this leads to a double, paradoxical situation that divides the nation: while a national cuisine attempts to silence regional cultural diversity, the fissures in the project of a homogeneous regional identity are revealed.

The Cosmopolitan Canopy: Race and Civility in Everyday Life Elijah Anderson 2011-03-28 An acclaimed sociologist illuminates the public life of an American city, offering a major reinterpretation of the racial dynamics in America. Following his award-winning work on inner-city violence, Code of the Street, sociologist Elijah Anderson introduces the concept of the "cosmopolitan canopy"—the urban island of civility that exists amidst the ghettos, suburbs, and ethnic enclaves where segregation is the norm. Under the cosmopolitan canopy, diverse peoples come together, and for the most part practice getting along. Anderson's path-breaking study of this setting provides a new understanding of the complexities of present-day race relations and reveals the unique opportunities here for cross-cultural interaction. Anderson walks us through Center City Philadelphia, revealing and illustrating through his ethnographic fieldwork how city dwellers often interact across racial, ethnic, and social borders. People engage in a distinctive folk ethnography. Canopies operating in close proximity create a synergy that becomes a cosmopolitan zone. In the vibrant atmosphere of these public spaces, civility is the order of the day. However, incidents can arise that threaten and rend the canopy, including scenes of tension involving borders of race, class, sexual preference, and gender. But when they do—assisted by gloss—the resilience of the canopy most often prevails. In this space all kinds of city dwellers—from gentrifiers to the homeless, cabdrivers to doormen—manage to co-exist in the urban environment, gaining local knowledge as they do, which then helps reinforce and spread tolerance through contact and mutual understanding. With compelling, meticulous descriptions of public spaces such as 30th Street Station, Reading Terminal Market, and Rittenhouse Square, and quasi-public places like the modern-day workplace, Anderson provides a rich narrative account of how blacks and whites relate and redefine the color line in everyday public life. He reveals how eating, shopping, and people-watching under the canopy can ease racial tensions, but also how the spaces in and between canopies can reinforce boundaries. Weaving colorful observations with keen social insight, Anderson shows how the canopy—and its lessons—contributes to the civility of our increasingly diverse cities.

SKYBORN (Book 4) Ancora's survival came at a great cost, and the reconstruction is an endless task for those who remain. Jacob and Alice explore what's left of the Lowlands, discovering the lost journals of Charles von Atlier in the rubble. Between those leatherbound covers, Jacob finds a secret that could help him rebuild Ancora, but first it will lead him back to the desert city of Midstream. Joining Mary on the Skysworn, Alice travels to Belldorn. There she encounters an unexpected ally, and threads of a rumor that carry her across the Crystal Sea. Pirates and rebels are just the beginning of her troubles as the King of Fel proves he has no intention of allowing the defeat in Dauschen and Ancora to go unanswered. Conflict spreads into the desert as dark forces threaten to crush all that remains of the lives Jacob and Alice once knew. To protect their people, allies new and old must stand together, or a long forgotten enemy will swallow them all. SKYFORGED (Book 5) A past unwritten. A shadow fallen. An enemy unmasked. Time grows short to secure the desert city of Midstream. Fel struck a devastating blow, and it's only a matter of time until their next attack. But Mordair's thirst for power is escalating. As King of Fel he is taking full advantage of his alliance with the kingdom across the sea. Together, they're preparing a siege on Belldorn sure to split their enemies' focus. The quest to come will be Jacob and Alice's riskiest yet as they journey straight into the heart of Fel itself. Yet as their hunt for allies continues, one truth refuses to be ignored. All paths lead to Belldorn ... and some won't make it out alive.

First, Do Less Harm Ross Koppel 2012-05-15 Each year, hospital-acquired infections, prescribing and treatment errors, lost documents and test reports, communication failures, and other problems have caused thousands of deaths in the United States, added millions of days to patients' hospital stays, and cost Americans tens of billions of dollars. Despite (and sometimes because of) new medical information technology and numerous well-intentioned initiatives to address these problems, threats to patient safety remain and in some areas are on the rise. In First, Do Less Harm, twelve health care professionals and researchers plus two former patients look at patient safety from a variety of perspectives, finding many of the proposed solutions to be inadequate or impractical. Several contributors to this book attribute the failure to confront patient safety concerns to the influence of the "market model" on medicine and emphasize the need for hospital-wide teamwork and greater involvement from frontline workers (from janitors and aides to nurses and physicians) in planning, implementing, and evaluating effective safety

initiatives. Several chapters in *First, Do Less Harm* focus on the critical role of interprofessional and occupational practice in patient safety. Rather than focusing on the usual suspects—physicians, safety champions, or high level management—these chapters expand the list of "stakeholders" and patient safety advocates to include nurses, patient care assistants, and other staff, as well as the health care unions that may represent them. *First, Do Less Harm* also highlights workplace issues that negatively affect safety: including sleeplessness, excessive workloads, outsourcing of hospital cleaning, and lack of teamwork between physicians and other health care staff. In two chapters, experts explain why the promise of health care information technology to fix safety problems remains unrealized, with examples that are at once humorous and frightening. A book that will be required reading for physicians, nurses, hospital administrators, public health officers, quality and risk managers, healthcare educators, economists, and policymakers, *First, Do Less Harm* concludes with a list of twenty-seven paradoxes and challenges facing everyone interested in making care safe for both patients and those who care for them.
